Fotosera

“Hayallerinizi yansıtan karolar”

“Tiles that reflect your dreams”

Fotosera; porselen karo üzerine uygulanan dijital baskı sanatıdır. Dijital fotoğraf teknolojisinin geniş olanakları kullanılarak özel olarak üretilir. Havuzların içine hayal ettiğiniz dünyayı yerleştirebilme imkanı sunan Fotosera, mercan resiflerinin renkli dünyasının coşkusunu, antik sütunların ve mozaiklerin görkemli ortamını, rengarenk balıkların görsellerini yansıtır.

Ayrıca havuz çevresinde, binaların iç ve dış mekanlarında dilediğiniz motifleri, logoları, seçtiğiniz fotoğrafları, istediğiniz yere uygulayarak dijital baskı teknolojisi ile kalıcı görsel zenginliğe kavuşabilirsiniz.

%100 porselen olarak ürettiğimiz Fotosera ürünleri, iklim koşullarına ve olumsuz çevresel faktörlere karşı dayanıklılığı sayesinde uzun kullanım ömrüne sahiptir.

Fotosera; It is the art of digital printing applied on porcelain tile. It is specially produced using the wide possibilities of digital photography technology. Offering the opportunity to place the world you imagine in the pools, digital print reflects the enthusiasm of the colorful world of coral reefs, the magnificent environment of ancient columns and mosaics, and the visuals of colorful fish.

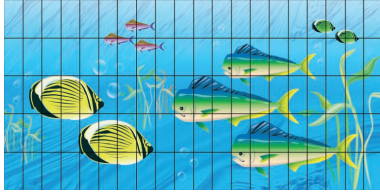

In addition, you can achieve permanent visual richness with Fotosera technology by applying the motifs, logos, photos you choose, anywhere you want, around the pool, indoors and outdoors of the buildings.

Fotosera products, which we produce as 100% porcelain, have a long service life thanks to their resistance to climatic conditions and adverse environmental factors.

PORSELEN TÜNEL SİSTEM

PORCELAIN TUNNEL SYSTEM

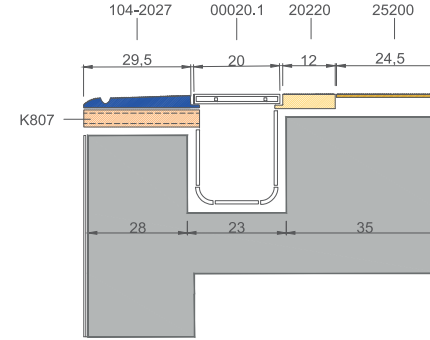

25 x 30 cm

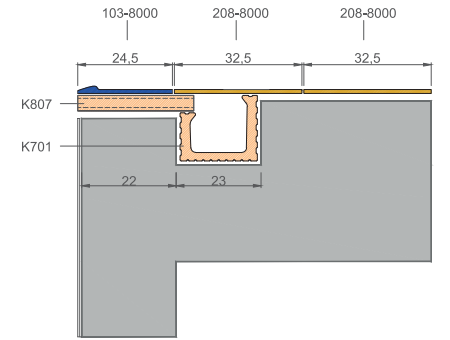

Ürün Kodu / Product Code / K807

Serapool Porselen tarafından özel olarak geliştirilen Tünel Sistem, havuz seviyesinden taşan suyu tahliye ederek terasların ıslanmasını önler ve havuz çevresinin kuru kalmasını sağlar. Havuz suyunun, Tünel Sistem kanalında bulunan gözeneklerden savak kanalına dalgalı değil de kırılarak akması ve savak kanalının kapalı bir sistem olmasından dolayı su sesi daha az gelir. Böylece su sesi ve havuz çevresinin ıslanması gibi kullanıcıları rahatsız edebilecek etkenleri devre dışı bırakan Tünel Sistem, konforlu bir kullanıma sunar. Mimari açıdan da havuzlara mükemmel bir estetik katan Tünel Sistem, işçilik nedeniyle oluşabilecek dengesiz su tahliyesi hatalarını da ortadan kaldırır.

The Tunnel System, specially developed by Serapool Porcelain, prevents the terraces from getting wet by draining the water overflowing from the pool level and keeps the pool surroundings dry. Since the pool water flows from the pores in the Tunnel System channel to the weir channel by breaking, not wavy, and because the weir channel is a closed system, the water sound is less. Thus, the Tunnel System, which disables the factors that may disturb the users such as the sound of water and the wetting of the pool area, offers comfortable use. The Tunnel System, which adds a perfect aesthetic to the pools in terms of architecture, also eliminates the unbalanced water discharge errors that may occur due to workmanship.
